DETAILED ACTION

1. This action is in response to application, filed on August 01, 2008 has been considered but are deemed moot because of Restriction Request below.
2. Claims 1-2, 7, 19, 54 are amended. Claims 54-59 are new. Claims 1-5, 7-14, 16, 19-43 and 54-59 are pending (claims 20-43 are withdrawn).

Election/Restrictions

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 7-14, 16 and 19, drawn to for searching stored data based on the one or more search queries to results, where the identified results are orderable by one or more search characteristics, providing a document that includes a multi-dimensional graph of the identified results at least one of the one or more search characteristics being represented as a dimension on the multi-dimensional graph, which is data or document searching, classified in class 707, subclass 3.
 - II. Claims 54-58, drawn to for causing additional information associated with one identified results to be displayed when a cursor is located over the visual representation that represents the one identified result, which is graphical user interface with tool tip with cursor position based display, classified in class 715, subclass 711.
 - III. Claim 59, drawn to for searching stored data based on the one or more search query to identify product results and proving product results, which is providing product item, classified in class 705, subclass 27.
4. The inventions are distinct, each from the other because of the following reasons:
- Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for searching stored data based on the one or more search queries to results, where the identified results are orderable by one or more search characteristics, providing a

document that includes a multi-dimensional graph of the identified results at least one of the one or more search characteristics being represented as a dimension on the multi-dimensional graph, which is data or document searching. Invention II can be used for causing additional information associated with one identified results to be displayed when a cursor is located over the visual representation that represents the one identified result, which is graphical user interface with tool tip with cursor position based display. Invention III can be used for searching stored data based on the one or more search query to identify product results and proving product results, which is providing product item. See MPEP 806.05(d).

5. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I and II are not required for Group III each other, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).

9. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
